Federal Lands Highway Program (FLHP)

Improving transportation to and within federal and tribal lands

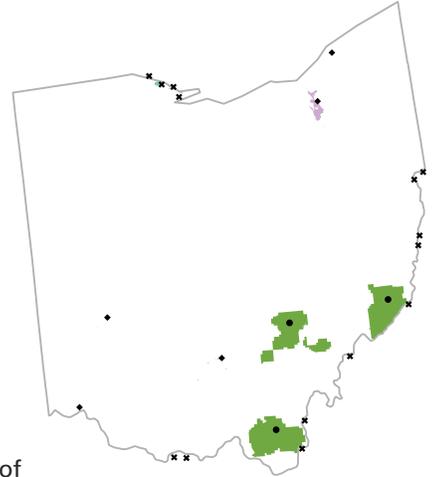

Ohio FLHP

OH FLHP road miles: **245**
Funding Authorized FY 98 – 07: **\$2,670,000**
Federal land acreage as percentage of total state area: **1.1%***
OH population: **11,478,006**

- National Park Service (9 units)**
- U.S. Forest Service (1)**
- U.S. Fish and Wildlife Service (3)**

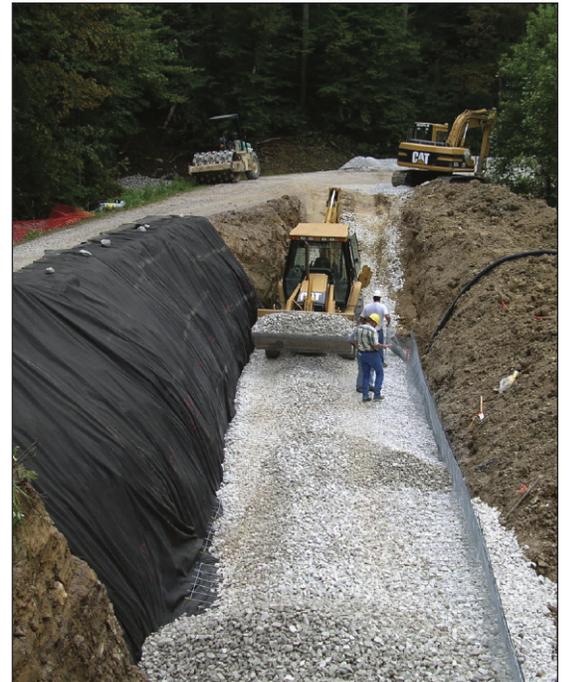

* This percentage includes Federal lands that are not part of the FLHP core program and not depicted on the map.

The Federal Lands Highway Program in

Ohio. Two roads providing recreational, commercial, and administrative access to Wayne National Forest were damaged from extremely heavy rainfall from hurricanes Frances and Ivan in August and September of 2004. The Eastern Federal Lands Geotechnical Section provided technical assistance to Wayne National Forest by performing the field and subsurface investigation activities associated with four separate landslides along Forest Road 132 and a proposed parking area along Lake Vesuvius Road.

The Geotechnical Section also provided assistance with structural repair alternatives for the forest to consider based upon the site conditions and the results of the subsurface investigation. The project involved landslide repair and roadway reconstruction on the roads. Both roads serve large portions of the Ironton Ranger District, and provide recreational,

commercial and administrative access to the forest. The Emergency Relief for Federally Owned Lands (ERFO) Program provided the majority of the funding, while the U.S. Forest Service funded the design and administration costs.
