***Note: Previous RFQs under this BPA have included the parenthetical notation “not subject to wage determination” for the flagging personnel line items. That notation has been deleted from those line items in this RFQ.**

Items in **RED** text are items the Government anticipates are necessary to complete the work. Items not highlighted red can also be quoted if necessary for contract completion.

Items marked with estimated quantities shall be quoted at the listed quantities. Unless otherwise stated below, the listed estimated quantities are ceiling quantities that may not be exceeded unless authorized by the Contracting Officer through a contract modification. Payment will be based on the actual quantity, not to exceed the ceiling quantity.

Shared Ceiling Price for Drilling Methods

The following four line items on the quote sheet have a shared ceiling price equal to the sum of the subtotals of all four line items:

- Casing Advancer Drilling (4 or 5 inch diameter);
- HQ3 core drilling;
- Hollow stem auger drilling 4 ¼” ID (8 ¼” OD); and
- Other - Mud-Rotary Drilling

The Government will not be obligated to pay the Contractor any amount in excess of the ceiling price, and the Contractor shall not be obligated to continue performance if to do so would exceed the ceiling price, unless and until the Contracting Officer modifies the contract to revise the ceiling price.

Shared Ceiling Price for Sampling Methods

The following two line items on the quote sheet have a shared ceiling price equal to the sum of the subtotals of both line items:

- SPT samples (other than 2.5 & 3”); and
- 2.5 & 3 inch split spoon samples

The Government will not be obligated to pay the Contractor any amount in excess of the ceiling price, and the Contractor shall not be obligated to continue performance if to do so would exceed the ceiling price, unless and until the Contracting Officer modifies the contract to revise the ceiling price.

Items not marked by the Government with estimated quantities may be quoted by the Contractor. For these items the Contractor shall set the not-to-exceed amount necessary to complete the Statement of Work. Payment will be made based on the actual quantity, not to exceed the quantity quoted by the Contractor. No increase will be made to Contractor-quoted quantities, even if the actual quantity exceeds the Contractor-quoted quantity. The Contractor shall continue performance regardless of whether the actual quantity exceeds the Contractor-quoted quantity.

Quotes shall follow pricing in BPA Master Quote Sheet. If prices quoted are different, a justification letter shall be supplied for approval by Contracting Officer. Quotations may or may not be considered with different prices, depending on the justification.

MT PARK 63(1) Tom Miner Creek Road Capital Improvements Project

2016 Geotechnical Investigation Plan

I. INTRODUCTION

A. Project Summary

The Western Federal Lands Highway Division (WFLHD) of the Federal Highway Administration is conducting a geotechnical subsurface investigation at two bridge sites near Tom Miner Creek Road in Park County, Montana. There are a total of 4 borings planned for a maximum drilling footage of 400 feet. Boring depths will range from a minimum of approximately 40 feet to a maximum of 100 feet. We anticipate drilling methods will include hollow stem augers, mud-rotary, casing advancer, and rock coring. Borings are located on the side of the existing dirt road and are truck drill accessible. The Field Inspector for this project will be a WFLHD Engineer or Geologist.

B. Project Location

The project area is located approximately 18 miles northwest of Gardiner, Montana off Highway 89 as shown on the attached Vicinity Map – Figure 1. The project is located in Park County and Custer Gallatin National Forest. The two bridge sites include Tom Miner Creek Bridge and Rock Creek Bridge. Information for each bridge is summarized in the table below.

Bridge	Location Description	Coordinates
Tom Miner Creek	On Tom Miner Creek Road (aka Old Yellowstone Trail Road in this stretch) near the intersection with Bobcat Lane	45.198939° North 110.908197° West
Rock Creek	On Old Yellowstone Trail Road near the intersection with Rock Creek Road	45.210838° North 110.903580° West

Aerial photo maps of the approximate boring locations are shown in Figures 2 to 3. Photos of the bridge approaches and proposed boring locations are included in the attached Supplemental Photo Exhibit for information only.

Well logs obtained from the Montana Bureau of Mines and Geology of nearby well locations (<http://data.mbmng.mtech.edu/mapper/mapper.asp?view=Wells&>) are attached for information only. Drilling conditions are expected to predominantly consist of relatively shallow groundwater next to the streams, coarse materials (sands, gravels, cobbles, boulders), and heaving sand conditions below the water table.

II. SCOPE OF WORK FOR DRILLING

All exploration locations contained within this Statement of Work (SOW) are shown on the attached Table of Borings. Approximate boring locations are also provided on the attached Boring Locations Maps. Boring locations will be marked in the field prior to the drilling start date.

Furnish a truck drill rig and support equipment capable of completing the work in tight shoulder areas along the dirt roads. Equipment shall include a hollow stem auger system, mud-rotary system, casing advancer system, standard SPT (2-inch OD), 2.5-inch OD and 3-inch OD split spoon (oversized) samplers, and an HQ3 wireline core drilling system. Mud-rotary or casing advancers may be used below the groundwater table where heave is encountered or expected with the approval of the COR. Mud-rotary is defined as the use of a drilling rod/bit combination without casing to recirculate drilling fluids to carry out cuttings and stabilize the hole from caving and heave. No other drilling types will be allowed unless authorized by the contracting officer via a contract modification. Furnish core boxes, wood separator blocks, and shipping containers for soil samples. WFLHD will furnish zip-lock bags for soil sample retention.

Perform all explorations in accordance with this SOW. Advance borings using the drilling methods listed on the Table of Boring and collect samples at 2.5-foot intervals in the upper 20 feet and every 5 feet thereafter. Drill holes to one of the following depths:

- The Estimated Total Depth indicated on the attached Table of Borings; or
- A minimum of 15 feet into competent bedrock if encountered prior to the Estimated Total Depth; or
- To the completion depth as directed by the WFLHD Field Inspector within the minimum to maximum depth range.

Do not terminate holes at depths less than the Minimum Depth listed. Additional depth may be required as directed by the COR up to the Maximum Depth listed. The total cumulative depths of drilling under this contract shall be no less than the sum total of Minimum Depths and no greater than the sum total of Maximum Depths indicated in the Table of Borings.

Shared Ceiling Price for Drilling Methods

The following four line items on the quote sheet have a shared ceiling price equal to the sum of the subtotals of all four line items:

- Casing Advancer Drilling (4 or 5 inch diameter);
- HQ3 core drilling;
- Hollow stem auger drilling 4 ¼" ID (8 ¼" OD); and
- Other - Mud-Rotary Drilling

The Government will not be obligated to pay the Contractor any amount in excess of the ceiling price, and the Contractor shall not be obligated to continue performance if to do so would exceed the ceiling price, unless and until the Contracting Officer modifies the contract to revise the ceiling price.

The depths for each type of drilling method may exceed the estimated quantities shown in the quote sheet, provided that the shared ceiling price is not exceeded. For example, it may be possible to extend hollow-stem auger to the maximum 100-ft depth, or extend mud-rotary from 10 to 80 feet. Furnish equipment for each drilling method so that each method will be capable of extending the boring to the Maximum Depth should drilling conditions be conducive to one method. The lowest cost drilling method shall be used until drilling conditions warrant switching, such as encountering heave in hollow-stem auger drilling, or refusal or caving in mud-rotary drilling, or encountering bedrock in the casing advancer.

Shared Ceiling Price for Sampling Methods

The following two line items on the quote sheet have a shared ceiling price equal to the sum of the subtotals of both line items:

- SPT samples (other than 2.5 & 3”); and
- 2.5 & 3 inch split spoon samples

The Government will not be obligated to pay the Contractor any amount in excess of the ceiling price, and the Contractor shall not be obligated to continue performance if to do so would exceed the ceiling price, unless and until the Contracting Officer modifies the contract to revise the ceiling price.

Collect drive samples using the standard SPT sampler unless otherwise directed by the COR. Use 2.5-inch and/or 3-inch samplers in gravelly material where sample recovery with the standard SPT sampler is poor. Replace the driving shoe on the split barrel samplers if it becomes dented or distorted or has excessive wear. Use split barrel samplers with a ball check and vent. Furnish metal or plastic sample catchers in the split barrel samplers. When coring or augering in highly weathered weak rock, take SPT samples to obtain blowcount data. Furnish and push Shelby tube samplers where directed by the Field Inspector.

Provide a canopy over the Field Inspector logging area during inclement weather.

A. Access

A total of 4 drill holes are required - one for each proposed bridge abutment. The planned boring locations are on the edges of the roadway approximately 20 feet away from the ends of the existing bridges with gravel, cobbles and boulders visible in the stream banks. Photos of the bridge boring access areas are provided in the attached Supplemental Photo Exhibit. No right-of-entry or right-of-way permits are necessary.

B. Utility Locate

A utility locate is necessary for this drill project at all locations. Complete a utility locate request using 811 or a local locate access number if available. COR approval is required before moving any borings. This includes, but is not limited to, conflicts with overhead utilities that may pose a safety hazard or prevent normal drilling operations.

C. Pre-Drill Meeting

Hold a pre-drill meeting on site with the WFLHD Field Inspector prior to starting drilling on the first day of drilling (no separate trip is necessary). At the pre-drill meeting the WFLHD contact will review all boring locations on site with the drill contractor. At that time boring locations may be modified slightly based on site conditions and to address safety hazards. The borings should be drilled as close to the marked locations as possible. Do not offset boring locations more than 5 feet from the locations staked during the pre-drill meeting.

D. Water for Drilling

Coring and casing advancer methods may use water or air to advance the hole. It is the Contractor's responsibility to identify and procure water sources. The Contractor is responsible for obtaining any permits that are required to draw water from streams for drilling operations.

E. Traffic Control

The Contractor is responsible for providing traffic control signage. Comply with the MUTCD Part 6 for all traffic control signs, devices, and activities. Typical Application 11, as shown in Figure 6H-11 of the MUTCD (<http://mutcd.fhwa.dot.gov/pdfs/2009r1r2/part6.pdf>), is anticipated to be appropriate based on the low volume and sight distances of the road. Flaggers are not anticipated to be necessary.

Road closures are not allowed.

F. Environmental Protection

Comply with all State, federal, and local ordinances, laws, and regulations concerning environmental protection at all work locations. Take precautions necessary to minimize environmental impacts during site investigation, and to make all required efforts to restore the site to its original condition. Dispose of all drilling fluids and cuttings in a safe and legal manner. Do not allow sediment-laden water, or other pollutants, to enter streams or other bodies of water. In the event that pollutants could enter streams or other bodies of water, all operations will be suspended until the situation can be rectified. Provide a Spill Prevention, Control and Countermeasure Plan (SPCC) at least 10 days before the drill start date. Provide a Spill Containment Kit, including specific prevention measures if refueling equipment within 150 feet of waterways.

A copy of the environmental document (Categorical Exclusion) will be provided at the pre-drill meeting, which includes the following mitigation measures for grizzly bears:

- Store all food, toiletries, and other potential bear attractants in bear-proof containers.
- Remove all trash from the project site each day and dispose of trash in a way that is unavailable to bears.
- Do not feed the bears.
- Report grizzly bear sightings or incidents to Montana Fish, Wildlife and Parks personnel as soon as possible.
- Modify construction activities any time the potential of compromising the safety of a grizzly bear is identified.

This Categorical Exclusion environmental document must be kept at the drilling site during all operations.

Evaluation Factors for Award

The Government will evaluate quotes using the Lowest Price Technically Acceptable (LPTA) source selection process. The Government will award a contract resulting from this solicitation to the lowest price, technically acceptable quoter whose quote conforms to the solicitation. (B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals Contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: \$4.27 per hour or \$170.80 per week or \$740.13 per month

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; 3 weeks after 5 years, and 4 weeks after 15 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year: New Year's Day, Martin Luther King Jr.'s Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4.174)

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) COMPUTER EMPLOYEES: Under the SCA at section 8(b), this wage determination does not apply to any employee who individually qualifies as a bona fide executive, administrative, or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than \$27.63 (or on a salary or fee basis at a rate not less than \$455 per week) an hour would likely qualify as exempt computer professionals, (29 C.F.R. 541.400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition, because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds \$27.63 per hour conformances may be necessary for certain nonexempt employees. For example, if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate, then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally, because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the application of the computer professional exemption. Therefore, the exemption applies only to computer employees

who satisfy the compensation requirements and whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours a week) and Sunday is part of your regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder. All dry-house activities involving propellants or explosives.

Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regrading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do

not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A links to the Directory may be found on the WHD home page at <http://www.dol.gov/esa/whd/> or through the Wage Determinations On-Line (WDOL) Web site at <http://wdol.gov/>.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).
- 2) After contract award, the contractor prepares a written report listing in order proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour decision to the contractor.
- 6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.
