

QUESTIONS AND ANSWERS

DTFH7016Q00055

- Q1.** Item 0001 has a description that includes APM (Advanced Photogrammetry Module) yet the APM has been requested in other item numbers (0002, 0003 & 0004). Is this a mistake? Should line item 0001 have APM in the description?
- A1.** This is a mistake. The description should read “36 MP RGB Camera w/15 mm, 25mm, and 35 mm lenses”. Amendment 0001 has been issued to address this.
- Q2.** The part numbers and units of issue cited in the RFQ for items 0004 (battery) and 0005 (cable) are old and have been changed. Does the government wish to buy old parts or is the current equivalent acceptable for bid?
- A2.** Market research with multiple vendors has indicated that the correct part numbers and units of issue are cited in the RFQ. If new units of issue and/or part numbers have been published by the manufacturer, a vendor may substitute provided that the TOTAL QUANTITIES required for each item are met.
