(865) 207-4062

## Project News

JUNE 27, 2016

Work began last week with the removal of a large dead tree. This removal was necessary as the threat of the tree falling was a danger to the new bridge. The removal and clean up went smoothly and was completed in a day. Upcoming work for Phase I includes the construction of cofferdams and a temporary work bridge. Phase I work is scheduled to be completed by July 15th.

## Notes

- Expect intermittent closure of the bridge and surrounding trails as work progresses
- Phase 1, in water work, is scheduled to be completed by July 15th
- Phase 2, removal and replacement of bridge will not begin until after Sept 5th
