## Project News

MAY 31, 2016

The first production blast will occur today at 1PM. The rock generated from this blast will get the contractor started on roadway construction as clearing and grubbing operations come to completion. A SWPPP inspection will also be held today after the blast. Rain is expected all week in the Naukati Bay area.

## Notes

- The Sitka Black-tail deer have had their fawns! This little guy was found on the project and has been reunited with its mother.
- Please use caution when driving through the project as the site will change day to day.
