Project News

JUNE 20, 2016

Clearing and grubbing operations are coming to a close this week. Hauling of waste will wrap up over the next few days and transition into rock hauling to the beginning of the project. Fish pipe installation will be the next work item and should be underway by early July. A SWPPP inspection will take place tomorrow as scheduled.

Notes

- Pictured above is the CAT 345 excavator loading a Volvo haul truck with waste to be hauled to the disposal site. Each truck carries an average of 12 cubic yards of material.
- Waste material will be hauled to the disposal site until completion of clearing operations.
- Please use caution when driving through the project as the site will change day to day.
