Project News

JUNE 27, 2016

Waste hauling and disposal transitioned into rock hauling and placement toward the beginning of last week. Rock hauling to the beginning of the project will continue this week as well as placement of separation geotextile fabric in areas of soft ground. Southeast Road Builders will be taking Monday and Tuesday (July 4th and 5th) off and the road will be opened to traffic.

Notes

- Pictured above is a Volvo haul truck dumping rock for embankment. The contractor is using Winfab 800N geotextile as the type 4A separation fabric, which can be seen in the bottom right of the photo.
- Please use caution when driving through the project as the site will change day to day.
