(907) 629-4110

Sean Wheeler

Inspector

sean.wheeler@dot.gov

Project News

AUGUST 1, 2016

The fish passage structure at 67+00 is in place and complete. The second fish passage structure at station 13+50 will be next and a by-pass road is already being constructed. Juvenile fish are being caught in traps and placed downstream, prior to any in water work. Blasting will continue throughout the week as the contractor is low on usable rock.

Notes

- Pictured above is the inside of the fish passage structure at 67+00 with native streambed material mixed in with cobbles and fish passage boulders.
- Please use caution when driving through the project as the site will change day to day.
