Project News

AUGUST 8, 2016

The fish passage structure at station 13+50 is underway this week. Two additional fish passage structures will need to be installed by the end of the month to fulfil the fish window according to the permits. Drilling and blasting will continue this week as usable rock is needed. SWPPP inspections are still taking place on Tuesdays.

Notes

- Pictured above is the fish passage structure at 13+50. The pipe is being constructed part-width to allow for traffic to move through the site throughout the day. One half of the fish pipe is complete and backfilled with the additional half being completed early this week.
- Please use caution when driving through the project as the site will change day to day.
