June 27, 2017

WFLHD

Bill Welton

Project Engineer

Bill.Welton@dot.gov

(907) 629-4110

Sean Wheeler

Inspector

sean.wheeler@dot.gov

Project News

AUGUST 15, 2016

The fish passage structures at station 13+50 and station 57+50 have been completed. Both pipes have flowing water from the weekends rain. The last fish passage structure will begin this week near the offices at the end of the project. Drilling and blasting will continue. Visitors from the WFL office will be here toward the beginning on the week.

Notes

- Pictured above is the fish passage structure inlet at station 57+50. The pipe is being constructed with fish passage boulders to create rearing habitat for native fish such as three salmon species and a variety of trout.
- Please use caution when driving through the project as the site will change day to day.
