## Project News

NOVEMBER 07, 2016

Southeast Road Builders continued working to place shot rock this last week to build the road to subgrade throughout the project. The contractor also started installing non-fish passage culverts last week.

Drilling and blasting has been ongoing and will continue throughout this next week.

This next week the contractor will be working to get ready for winter shutdown of the project on November 18th.

**Above:** The D7 dozer with a tow behind grid roller attachment and the grader work to spread and compact the 3-inch minus material.

**Left:** The CAT loader is working to clear the roadway after blasting.

## Notes:

- Please use caution when driving through the project as the site will change day to day.
