

Rock Creek Culvert

This Week:

Ahtna Environmental Inc. worked with their subcontractor, CLI, to widen the roadway at Mile 5 in order to accommodate traffic as they begin work. The contractor also began work on their stream diversion at Rock Creek Bridge.

Next Week:

Ahtna Environmental, Inc. with their subcontractor, CLI, will begin building riprap guidebanks at mile 5 culvert as well as begin some material excavation within the roadway prism. They will work on their stream diversion at Rock Creek Bridge and potentially begin preparing the foundation for the structural plate pipe.
