Reconstruction

ID PFH 26(3)

Highway 75 between mileposts 206.7 and 207.9 through **“Pebble Beach”**

This week expect to see some workers near the roadway as we continue to work on the concrete barriers that are being installed. The tall rock screens will be installed on the barriers to protect traffic from any rock fall that could happen with excavation.

You will see a bustle of workers on the job site working on various site work such as installing a black fencing called ‘silt fence’, top soil being stripped off with a large excavators, and many other things.

Expect minor delays of up to 15 minutes at all times of the day. The project is limited to one-lane of traffic with signals controlling traffic at night.

Please be very cautious when traveling through the work zone as it is very narrow and watch for the reductions in the speed limit.

Verifying slope stakes and reference points.

Road Closure Information

Week of August 28, 2016

Expect delays of 15 minutes

No closures this week
