Bridge Replacement

ID PFH 91(1)

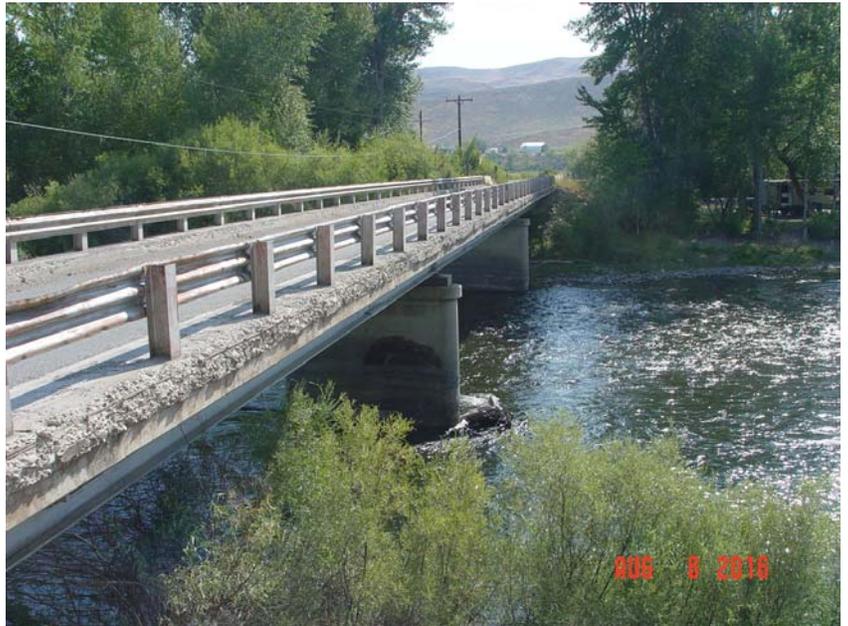

Forest Highway 21 intersecting US 93: “Shoup” Bridge

On site work is anticipated to start for the project on or about September 26, 2016, with Temporary Traffic Control being set up and the mobilization of equipment.

Once work does start up there will be minor delays of up to 20 minutes with one lane traffic controlled by Flaggers. For now during non working hours, the traffic patterns will be restored to their original set ups.

As the work progresses additional updates will be sent out on a weekly basis or as needed.

Please be very cautious when traveling through the work Zone.

Existing Shoup Bridge
