Bridge Replacement

ID PFH 91(1)

Forest Highway 21 intersecting US 93: “Shoup” Bridge

Contractor installation of soil erosion and sediment control devices at SW and SE of the project site is now completed as well as installing some of the temporary traffic control signs.

It is anticipated the work of removing designated trees, construction site clearing and grubbing, some survey work and possibly excavation and embankment of diversion (detour) road will start next week. Mobilization of earthwork equipment is also expected.

While work is going on, there will be minor delays of up to 20 minutes with one lane traffic controlled by Flaggers. During non working hours, there will be no delays.

As the work progresses additional updates will be sent out on a weekly basis or as needed.

Please be very cautious when traveling through the work Zone.

Looking at SE Clearing limit
