Williams Creek (Shoup) Bridge Replacement Project

October 24, 2016

**Bridge Replacement**

ID PFH 91(1)

## Forest Highway 91 intersecting US 93: “Shoup” Bridge

Contractor has completed removing the designated trees and has cleared and grubbed SE and SW construction areas of bushes and vegetation to the marked construction limits and the topsoil has been conserved and windrowed within installed soil erosion and sediment control devices. Slope stakes for the construction of Diversion Road (detour) for at SW and SE portions are done by the surveyor.

It is anticipated the work of excavation and embankment of the diversion road will start next week.

While work is going on, there will be minor delays of up to 20 minutes with one lane traffic controlled by Flaggers. During non working hours, there will be no delays.

As the work progresses additional updates will be sent out on a weekly basis or as needed.

Looking at SE Clearing Operation

## Road Information:

**Week of October 24, 2016**
