**Bridge Replacement**

ID PFH 91(1)

## Forest Highway 91 intersecting US 93: “Shoup” Bridge

Contractor has started on construction of SW diversion road (detour) subgrade and preparing for installation of an 18” cross road pipe culvert that will function both the diversion road and new main road.

It is anticipated that the above work would continue this weekend and part of the next week. Construction of SE portion of the diversion road may also be taking place as well after construction of a short retaining wall to protect designated trees.

While work is going on, there will be minor delays of up to 20 minutes with one lane traffic controlled by Flagger. During non working hours, there will be no delays.

As the work progresses additional updates will be sent out on a weekly basis or as needed.

Please be very cautious when traveling through the work Zone.

SW Subgrade Operation
