**Bridge Replacement**

ID PFH 91(1)

## Forest Highway 91 intersecting US 93: “Shoup” Bridge

Contractor is almost done by completing the diversion road (detour) subgrade. Survey crew was busy with placing hubs, in order to get subgrade completed to the placed hub.

It is anticipated that the work of removal and replacement of the existing culvert at irrigation ditch located about 300' west of the bridge end as well as completing subgrade would take place.

Construction of roadbed base for diversion road may also be taking place.

While work is going on, there will be minor delays of up to 20 minutes with one lane traffic controlled by Flaggers. During non working hours, there will be no delays.

As the work progresses additional updates will be sent out on a weekly basis or as needed.

Please be very cautious when traveling through the work Zone.

SE subgrade of diversion road ready for finish grading

## Road Information:

**Week of November 7, 2016**
