July 13, 2015

Project Description

This project consists of drainage, re-grading, and calcium chloride-stabilized aggregate surfacing of the B-01 Road (Sourdough Rd.) near Geysers, MT, beginning at the intersection with MT State Secondary 551 and proceeding east approximately 4.2 miles.

Road Conditions

The current road condition is the existing reconditioned gravel.

Traffic Delays

Intermittent single-lane traffic zones should be expected beginning the week of July 20th. Reconditioning activities, aggregate placement, and aggregate stabilization will be taking place. No future closures are scheduled.

Current and Upcoming Work

Crushing operations are continuing. Surface reconditioning activities are partially complete and will continue next week. Aggregate placement is scheduled for the week of July 20th and stabilization of the aggregate course is scheduled shortly thereafter.
