Project Description

Rimini Road is located 10 miles west of Helena, MT off of Highway 12. The project begins at the intersection with Highway 12 and extends 6.25 miles south to the intersection with Chessman Reservoir Road. Project improvements include reconstructing three bridges, asphalt paving, guardrail updates, and realignment of 2,000 ft of Ten Mile Creek away from the roadway. Lewis and Clark County will assume maintenance duties upon completion of the project.

Road Surface conditions

The current road surface is mainly the existing compacted gravel. As excavation operations progress and new fill is placed, the road surface may become rougher and rockier in spots.

Current and Upcoming Work

The contractor, Debco Construction, will be focusing on embankment construction between bridge #1 and Hwy 12 for the next 2 weeks, but may jump ahead to “rough cut” slopes and produce embankment material. Bridge substructure construction has begun, and all three bridges are scheduled to be complete by this fall. Aggregate crushing operations continue at MP 0.7 and will finish this fall. Aggregate production activities will have the same schedule as the road construction, 7am to 6pm. Paving is anticipated for summer 2016.

Traffic Delays

Bridges #1 and #3 have been removed, and the speed limit at the road detours is 15mph at all times. Expect 30 minute construction delays, Monday through Friday, 7am to 6pm. Traffic will be controlled by flaggers and pilot car. There may be laborers working on the road shoulder, please drive safe and be courteous. Please follow the newsletter for future updates.

The Storm Water Pollution Prevention Plan (SWPPP) for this project is available for viewing at the Project Office of the Contractor, located at the staging area next to Ten Mile Water Treatment Plant.

Bridge demolition at Bridge #1. Approx 1.0 mile from HW 12.

Rip rap production at bridge #2. Approx. 2.4 miles from HW 12.

Pouring Concrete into drilled piles at bridge #2. Approx. 2.4 miles from HW 12.
