

ROUTE 1 CORRIDOR AT MARINE CORPS BASE QUANTICO PLANNING/PRELIMINARY ENGINEERING STUDY

U.S. Department of Transportation
Federal Highway Administration

WE NEED YOUR INPUT BY APRIL 9, 2013

Thank you for taking the time to complete this comment form. We encourage your continued participation to ensure future corridor designs meet the needs of residents, businesses and commuters.

The Federal Highway Administration (FHWA) Eastern Federal Lands Highway Division (EFLHD) is working improve safety and mobility on US Route 1 from Joplin/Fuller Road, south to the Telegraph Road intersection at Boswell's Corner, in cooperation with Stafford County, Prince William County, Marine Corps Base Quantico, and Virginia Department of Transportation (VDOT).

Study goals:

- Support adopted local and regional plans by improving the Route 1 corridor
- Efficiently facilitate the movement of peak-hour traffic flows to, from, and along Route 1
- Reduce peak-hour traffic congestion and its effects on adjacent facilities by making improvements at key locations along Route 1
- Improve safety on roadways in the study area
- Accommodate future travel demand in the study area
- Support national defense and national capital mobility needs by improving transportation conditions along Route 1

With input from you, the study team has developed a final recommended alternative which includes widening Route 1 to six lanes and an improved interchanged at Russell Road. As this study concludes, your input on this form will help guide future phases of the process to improve Route 1.

ABOUT YOU

First Name: _____ Last Name: _____

Organization/Affiliation: _____

Email Address: _____

Do you want to be included in the study email list to receive periodic updates? Yes No

Please indicate how you learned about this study. (check all that apply)

- Website Email Newspaper Ad
 City/County Email Other (please specify) _____

Check those that best describe your interest in the studies (check all that apply)

- Resident in the Area Property Owner in the Area Employee in the Area
 Business Owner in the Area Other _____

ROUTE 1 RECOMMENDED ALTERNATIVE

1. On a scale of 1 to 6, how well does the recommended alternative meet your expectations for the Route 1 corridor? (1 is very poorly, 6 is very well)

1-very poorly

2

3

4

5

6 – very well

2. Following this study, what could be done in more detailed design of this project to improve the final concept?

ADDITIONAL ROUTE 1 CORRIDOR PROJECT: TELEGRAPH ROAD IMPROVEMENTS

3. Is there additional information that you think should be considered as the team moves forward with design and construction improvements to Telegraph Road?

ADDITIONAL COMMENTS?

4. Please provide any additional input regarding the Route 1 corridor:

You may return this survey through one of the following means:
