

MIDDLE FORK SNOQUALMIE RIVER ROAD

CONSTRUCTION NEWSLETTER

July 13, 2017

PROJECT COMPLETE

This is the final weekly newsletter for this construction project.

This week the contractor completed striping, guidepost installation, final project cleanup, and moved off of the project site. All work on this project was completed this week.

Additional construction will be completed on the Middle Fork Snoqualmie River Road Slope Stabilization Project. This project will complete the short section of roadway near the river gauging station that is currently gravel. This project will also place rip rap under the Lake Dorothy bridge, and overlay portions of Middle Fork Snoqualmie River Road and Lake Dorothy Road between Twin Falls Middle School and Valley Camp. The contractor will be moving on to the project in late July. Construction will begin in August and continue in to October. There will be a three week closure in August when the road will be closed between noon Monday and noon Friday. The closure will be at Mine Creek, approximately 1 mile above Mailbox Peak.

This project website will be updated with information on the Slope Stabilization Project. Newsletters for the Slope Stabilization project will start later this month.
