## NOTE:

1. Signs are shown for one direction of travel only. Place signs similar to those depicted for the opposite direction of travel.
2. Final location and spacing of devices may be changed to fit field conditions as approved by the CO.
3. For project specific minimum width, refer to Special Contract Requirements, Section 156
4. If the roadway surface is paved, install temporary pavement markings. If nearest no-passing zone is within 400', extend markings to connect zones.
5. If closure is completely within the project limits, eliminate the ROAD WORK AHEAD (W2O-1) and END ROAD WORK ( $620-2$ ) signs.
6. Install PASS WITH CARE sign (R4-2) at ends of no-passing zone if directed by the CO.
7. Place the barrier according to the AASHTO Roadside Design Guide. Terminate barrier ends outside the work zone clear Guide. Terminate barrier ends outside the work zone Include reflectors on barrier at $25^{\prime}$ intervals.
8. Do not allow equipment, materials, or vehicles to be parked or stored in the buffer space.
