### Notes to the Designer

**Updated August 2021**

**G4 and MGS W-Beam Guardrail, Type Flared Terminal and Grading**

#### General Information
- Printing should be done from the [Sheet] View model

#### Appropriate Applications.
Many flared terminals are proprietary systems. Manufacturers of common flared terminal systems include Energy Absorption Systems, Trinity Highway LLC, Road Systems, Inc., and Barrier Systems, Inc. Refer to the manufacturer’s recommendations for information on specific flared terminals.

#### Limitations.
Site grading in the area of the terminal is an important consideration. Verify that the required grading is included in the project design.

#### Layout Guidance.
See AASHTO *Roadside Design Guide* Section 8.3.3
See the FLH Midwest Guardrail System FAQ document for more information.

#### Applicable SCRs
- Section 563 (if weathering agent applied to galvanized elements)
- Section 617
- Section 710
- Section 725 (if weathering agent applied to galvanized elements)

#### Typical Pay Item Used
- 61702-0600 Terminal section, type flared [EA] for G4
- 61702-1600 Terminal section, type MGS flared [EA] for MGS

#### Updates
- **February 2019**
  - New Detail drawing
- **April 2020**
  - Updated notes and straight flare option detail. Updated MGS drawing.
- **August 2021**
  - Updated for OpenRoads Designer
NOTE:
1. Install a flared W-beam guardrail terminal according to the manufacturer's recommendations. See manufacturer's drawings for other details.

2. Construct the terminal grading as shown in the staking notes or model. If no staking notes or model is provided, construct grading as shown on this sheet and as recommended by the manufacturer.

3. For design purposes, the length of need is assumed to begin as shown on the drawing. Verify the length of need with the manufacturer of a specific product. Adjust grading as necessary to install the flared terminal according to the manufacturer's recommendations.

4. Pave widened shoulder on both ends of guardrail runs when indicated on the plans.

5. Install a reflectorized object marker on the end of the terminal.

6. Construct a 1V:4H or flatter slope outside of the guardrail terminal grading extents where practical.

### STRAIGHT FLARED OPTION
**MGS AND G4 W-BEAM GUARDRAIL**

### PARABOLIC FLARED OPTION
**G4 W-BEAM GUARDRAIL**
