

NOTES:

1. Locate and set sign height according to the "Manual on Uniform Traffic Control Devices" (MUTCD), latest edition.
2. Use wood battens bolted to post at vertical spacings not to exceed 30 inches. See Detail E633-04.
3. Use double posts if W is over 3 feet.
4. For sign punching details, see the blank standards in the "Standard Highway Signs and Markings" as specified in the latest edition of the MUTCD.
5. Refer to Detail E633-01 for sign mounting details.

NOTES TO THE DESIGNER

January 16, 2019

General Information

1. *If any of Details E633-02, -03, -04, or -05 is used, also include Detail E633-01.*
2. *For Breakaway Sign Supports, use Detail E633-02 for Corrosion Resistant Steel and use Detail E633-03 for Wood and Steel.*
3. *For sign bracings if needed, use Detail E633-04 (Sign bracings are usually needed for signs with 48" width or greater). Verify with Safety, COE and Partner Agency if bracings are required.*
4. *For "Folding Signs" use Detail E633-05.*
5. *Project Specific Details should be created for NPS UniGuide sign systems.*

Applicable SCRs.

1. Section 633 PERMANENT TRAFFIC CONTROL.
Make sure to specify the post materials (See FP 633.01 for designated posts materials: wood, aluminum, galvanized steel, or corrosion resistant steel) in the plans (typically on Summaries and Schedules sheets), in the sign pay item name, or in the SCR.

Typical Pay Item Used

- 63305-0100 thru 63305-1600 Posts, steel (Different sizes/shapes) (LNFT)
- 63305-1700 thru 63305-2000 Posts, wood (Different sizes) (LNFT)
- 63306-0100 thru 63306-1600 Posts, steel (Different sizes/shapes) (Each)
- 63306-1700 thru 63306-2000 Posts, wood (Different sizes) (EACH)
- 63319-0000 Post sleeve (EACH)

Updates

- 01/2019 – Updated "General Information" due to Details updates.
- 09/2020 - Revised the applicable SCRs section to not refer to LOS (There are no 633 LOS in the library yet).
