NOTES:
1. Use the Type A, blocked-out, system for median guardrail.
2. Use weathering steel for all structural steel and fastener hardware as specified.
3. Place a terminal section on both approach and trailing ends of median barrier installations. See details ET 617-61 and Standard 617-62.
4. Use no more than 3 short guardrail posts in a row. A 25-inch diameter round anchor may be used instead of the square anchor shown. A reduced size is acceptable in solid rock as approved by the CD.
5. In areas where the rail face is offset a minimum of 20 feet from the edge of travel lane, a maximum approach shoulder slope of 1:16:1 may be used.
