**INSTALLATION PROCEDURES**

Install Rolled Erosion Control Product (RECP) along the bottom of the ditch and up the side slopes as follows:

**Step 1:** Bury the top end of the RECP mat strip in a trench 6 inches or more deep.

**Step 2:** Tamp the trench full of soil. Secure with row of fasteners spaced at 6-inch centers and placed 4 inches down from the trench.

**Step 3:** Overlap by burying the upper end of lower RECP mat strip as in step 1 and 2. Overlap end of top strip 4 inches and fasten.

**Step 4:** Construct erosion stop (check slot) at 30-foot intervals. Bury fold of RECP mat in slot trench and tamp. Fasten with double row of fasteners. See Section A-A.

---

**CROSS SECTION THROUGH V AND FLAT BOTTOM DITCHES**

**SECTION A-A**

**EROSION STOP (CHECK SLOT)**

- RECP (typ.)
- Fastener (typ.)
- Side slope (typ.)
- Double row of fasteners at erosion stop
- Space fasteners at 12" centers
- Erosion stop (check slot)
- See Section A-A
- Apply seed and fertilizer See Note
- Wood stakes 1" X 3" stock cut into triangular shape
- Typical staples No. 11 gauge wire
- 6" deep X 6" wide traverse trench at 30' intervals along length of ditch
- Backfill with soil and tamp

**DETAIL A**

**TYPICAL GROUND FASTENERS**

- Ditch Stabilization with RECP

**NOTE:**
Apply seed and fertilizer as recommended by the manufacturer before placing the rolled erosion control product.
