For bare root trees and shrubs, prune branches about 1/3 for nursery stock and about 1/2 for collected material as indicated by dotted lines. Do not cut leader.

Wire anchored from the trunk at least equal to two-thirds the height of the tree and twisted at the center point.

Approved conspicuous marker

Place roots in natural position. Work topsoil carefully around roots. Soak the topsoil around the roots by pouring water on top until all voids are completely saturated and filled.

12" (min.)

14 gage or heavier galvanized wire

Roughen subsoil in bottom of hole and scarify sides to prevent sealing

Topsoil thoroughly mixed with specified soil conditioner prior to placing around roots

2" x 2" wood stake driven prior to backfilling

12" (max.), 6" (min.) or outside burlap

METHOD OF PLANTING CONTAINER OR BALLEDS AND BURLAPPED TREES AND SHRUBS

12" (max.)

Topsoil

Cut bindings, and pull down upper half of burlap

For trees and shrubs, place mulch as directed.

Plant set in hole same level to the natural ground as it stood in nursery or container

Plant set in hole same level to the natural ground as it stood in nursery or container

Wire anchored from the trunk at least equal to two-thirds the height of the tree and twisted at the center point.

Approved conspicuous marker

14 gage or heavier galvanized wire

Depression to collect water

Wrap material on deciduous trees where required

Fasten wires to 2" x 4" x 24" wood stakes or approved metal anchors driven firmly into the ground (typ.)

2" x 2" wood stake driven prior to backfilling

Wrap material on deciduous trees where required

METHOD OF GUYING DECIDUOUS TREES OVER 12' AND CONIFERS OVER 4'

1/2" dia. x 12" long nylon, rubber or reinforced plastic hose with tree, wrapping paper under hose

METHOD OF STAKING DECIDUOUS TREES UNDER 12'

1/2" dia. x 12" long nylon, rubber or reinforced plastic hose with tree, wrapping paper under hose

Settle the loose soil around the ball of earth by soaking it thoroughly with water

Roughen subsoil in bottom of hole and scarify sides to prevent sealing

Topsoil thoroughly mixed with specified soil conditioner prior to placing around roots

For trees and shrubs, place mulch as directed.

Plant set in hole same level to the natural ground as it stood in nursery or container

Wire anchored from the trunk at least equal to two-thirds the height of the tree and twisted at the center point.

Approved conspicuous marker

14 gage or heavier galvanized wire

Depression to collect water

Wrap material on deciduous trees where required

Fasten wires to 2" x 4" x 24" wood stakes or approved metal anchors driven firmly into the ground (typ.)

2" x 2" wood stake driven prior to backfilling

Wrap material on deciduous trees where required

METHOD OF PLANTING BARE ROOT TREES AND SHRUBS AND

NOTES:
1. Commercial plant ties may be used in lieu of hose and wire guying as approved by the CO.
2. Provide construction grade, rough or dressed Douglas fir or pine stakes.
