NOTE:

1. The maximum cross slope of ramps must not exceed 2% in any direction.

2. Use a smooth, non-skid, non-reflecting surface on the ramp surface, exclusive of detectable warning surfaces.

3. Provide curb ramps perpendicular to the curb. Avoid slewing the ramp face.

4. Detectable warnings must be installed between walls, pavers, or slabs that are flush and free of abrupt vertical changes greater than 3.5 inches.

5. Locate detectable warnings outside of ramp warning surfaces or midramps.
