NOTE:
1. The maximum cross slopes of ramps must not exceed 1% in any direction.
2. Use a means between finish paving practice to create a slip resistant surface on concrete ramp surfaces, exclusive of the detectable warning field.
3. Construct curb ramp parallel to the curb. Avoid allowing the ramp face.
4. Construct ramp transitions between streets, gutters, or areas that are flush and have abrupt vertical changes in excess of 15 cm.
5. Locate drainage inlets and manholes outside of ramp leading surfaces or transitions.
6. Dimensions without units are millimeters.
